

MANISH KUMAR

Full-Stack Developer — Java/Spring Boot + React/Node (MERN)

Aligarh, India | +91 8191994215 | manishprajapati.cs1@gmail.com | manishdev.xyz | linkedin.com/in/manishkumarcs1 | github.com/ManishKumarCs

SUMMARY

Programmer Analyst Trainee with hands-on experience across Java/Spring Boot + Angular and MERN (React, Node.js, Express, MongoDB) stacks. Skilled in building secure REST APIs (JWT, RBAC), automated test suites (Selenium, TestNG, Cucumber, REST Assured), and deploying applications with Docker and AWS (EC2, S3).

SKILLS

Languages: Java, JavaScript, Python, SQL

Backend: Spring Boot, JPA/Hibernate, Node.js, Express.js

Frontend: Angular, React.js, HTML/CSS, Bootstrap, Tailwind CSS

Testing & Automation: Selenium WebDriver, TestNG, Cucumber, REST Assured, Unit & Integration Testing

APIs & Security: RESTful API Design, JWT (HS384), Role-Based Access Control (RBAC), BCrypt

Data: MySQL, MongoDB

DevOps & Tools: Git/GitHub, Maven, Postman, CI/CD Pipelines, Docker, AWS (EC2, S3), Vercel, Netlify, Render

Practices: Agile Methodologies, Code Review, Team Collaboration, Problem Solving

EXPERIENCE

Programmer Analyst Trainee, Cognizant, Coimbatore, India 03/2026 – 07/2026

- Developed Blood Management System modules using Spring Boot, JPA/Hibernate, and Angular, supporting a 5-member Agile team's sprint goals.
- Built a hybrid test automation framework (Selenium, TestNG, Cucumber, REST Assured) using TDD/BDD, automating 20+ test cases within the CI/CD pipeline.
- Conducted code reviews and pair debugging with a 5-member team while managing version control with Git/GitHub and automated builds with Maven within the Agile workflow.

Full Stack Web Developer Trainee, Devslane Pvt. Ltd., Noida, India 06/2024 – 09/2024

- Engineered MERN stack applications for a client project, integrating JWT authentication and RBAC to secure user access.
- Optimized MongoDB queries and integrated RESTful APIs, improving application responsiveness and data retrieval.
- Built responsive, user-friendly interfaces using HTML, CSS, and JavaScript, and managed version control and API testing with Git and Postman.

PROJECTS

MediConnect - Healthcare Management System ↗ | Spring Boot, Angular, MySQL, JWT 🔗 GitHub May 2026

- Built a full-stack healthcare platform for Patients, Doctors, and Admins with appointment scheduling, prescriptions, and doctor approval workflows.
- Implemented JWT (HS384) auth with BCrypt hashing; developed 15+ REST APIs using Spring Boot, JPA/Hibernate, MySQL across 6 controllers.
- Containerized the application with Docker for consistent local development and deployment, and deployed the frontend to Vercel for public access.

Onboarding Management System ↗ | React.js, Node.js, Express.js, MongoDB 🔗 GitHub July 2025

- Built a role-based HR onboarding platform with 20+ REST APIs, document uploads, notifications, and employee lifecycle management.
- Designed MongoDB schemas and Express.js middleware for authentication, leave requests, and onboarding progress tracking.
- Built a responsive, animated UI with React (Vite), Tailwind CSS, and Framer Motion, supporting real-time onboarding status tracking across 3 user roles (Admin, HR, Employee).

EDUCATION

Bachelor of Technology, Computer Science, GLA University, Mathura, India

Graduated - June 2026 | CGPA: 8.48/10

Diploma, Computer Science & Engineering (Honors), Vivekananda College Of Polytechnic, Aligarh, India

Graduated - May 2023 | Percentage: 83.3%

ACCOMPLISHMENTS

- Solved 300+ Data Structures & Algorithms problems on LeetCode and GeeksforGeeks, strengthening problem-solving and coding proficiency.
- Led development of the Blood Management System during Cognizant internship, ensuring on-time delivery.
